

Nonparametric Statistics for Spike Data Analysis

Jonathan Platkiewicz

Department of Mathematics, City College of New York
Neuroscience Institute, New York University

Theoretical Neuroscience Workshop
Janelia, Sept 30, 2016

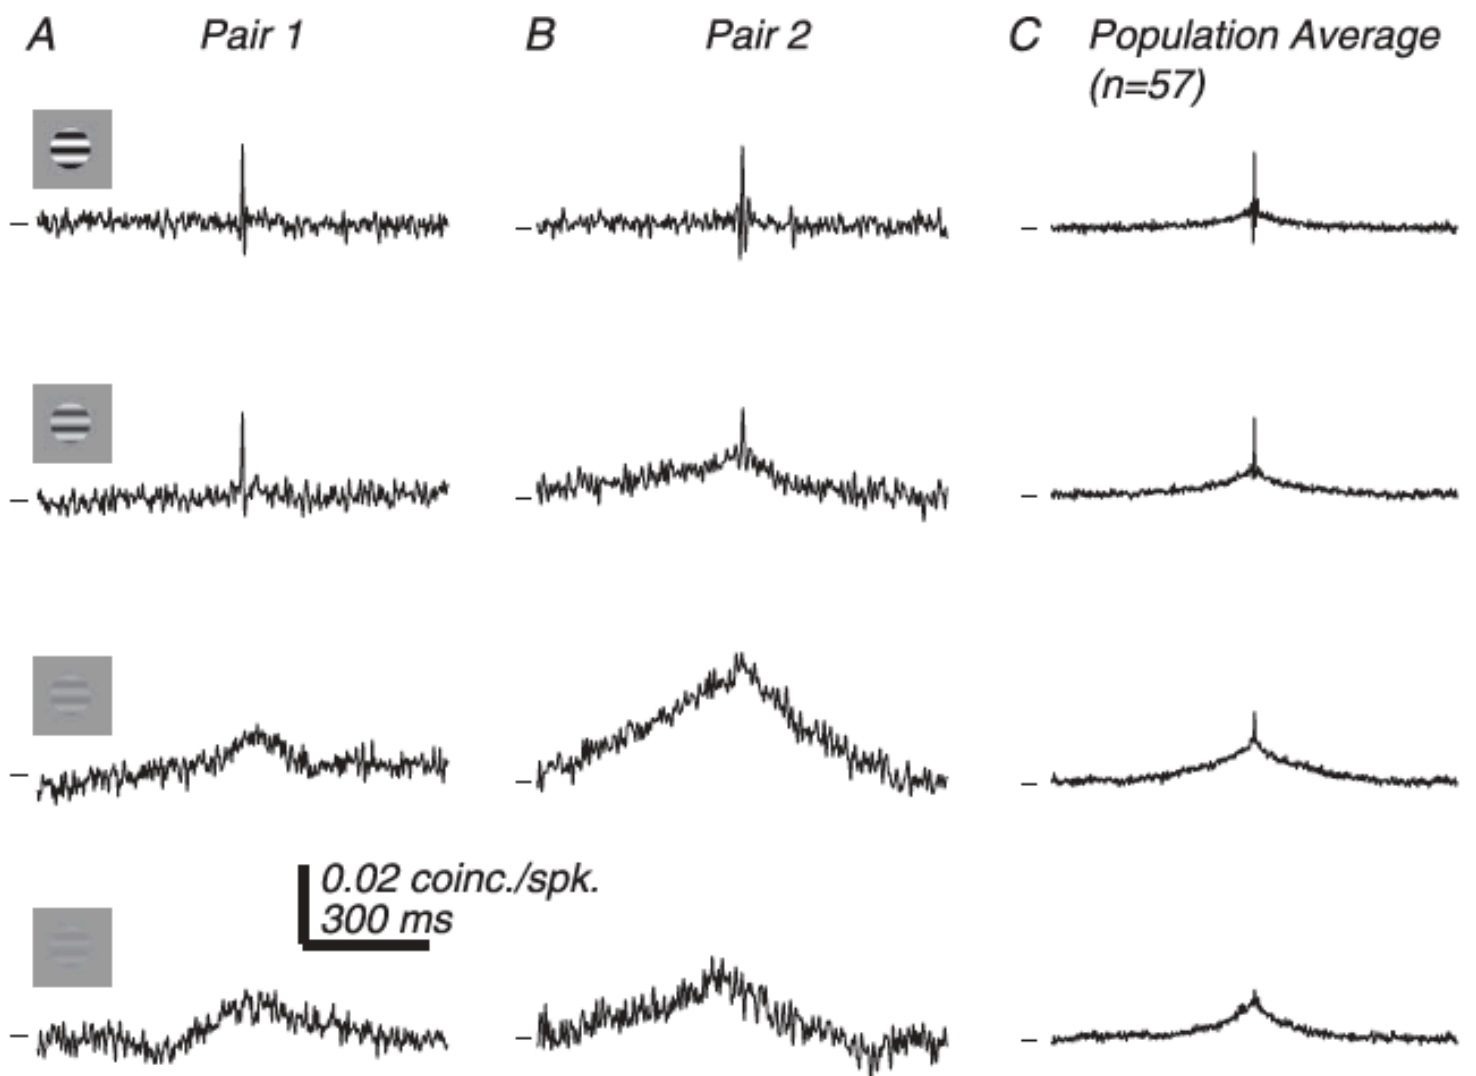

Bienenstock Thought Experiment

Diesmann, Gewaltig & Aertsen (1999), Nature

Amarasingham, Harrison, Hatsopoulos & Geman (2012), J Neurophysiol

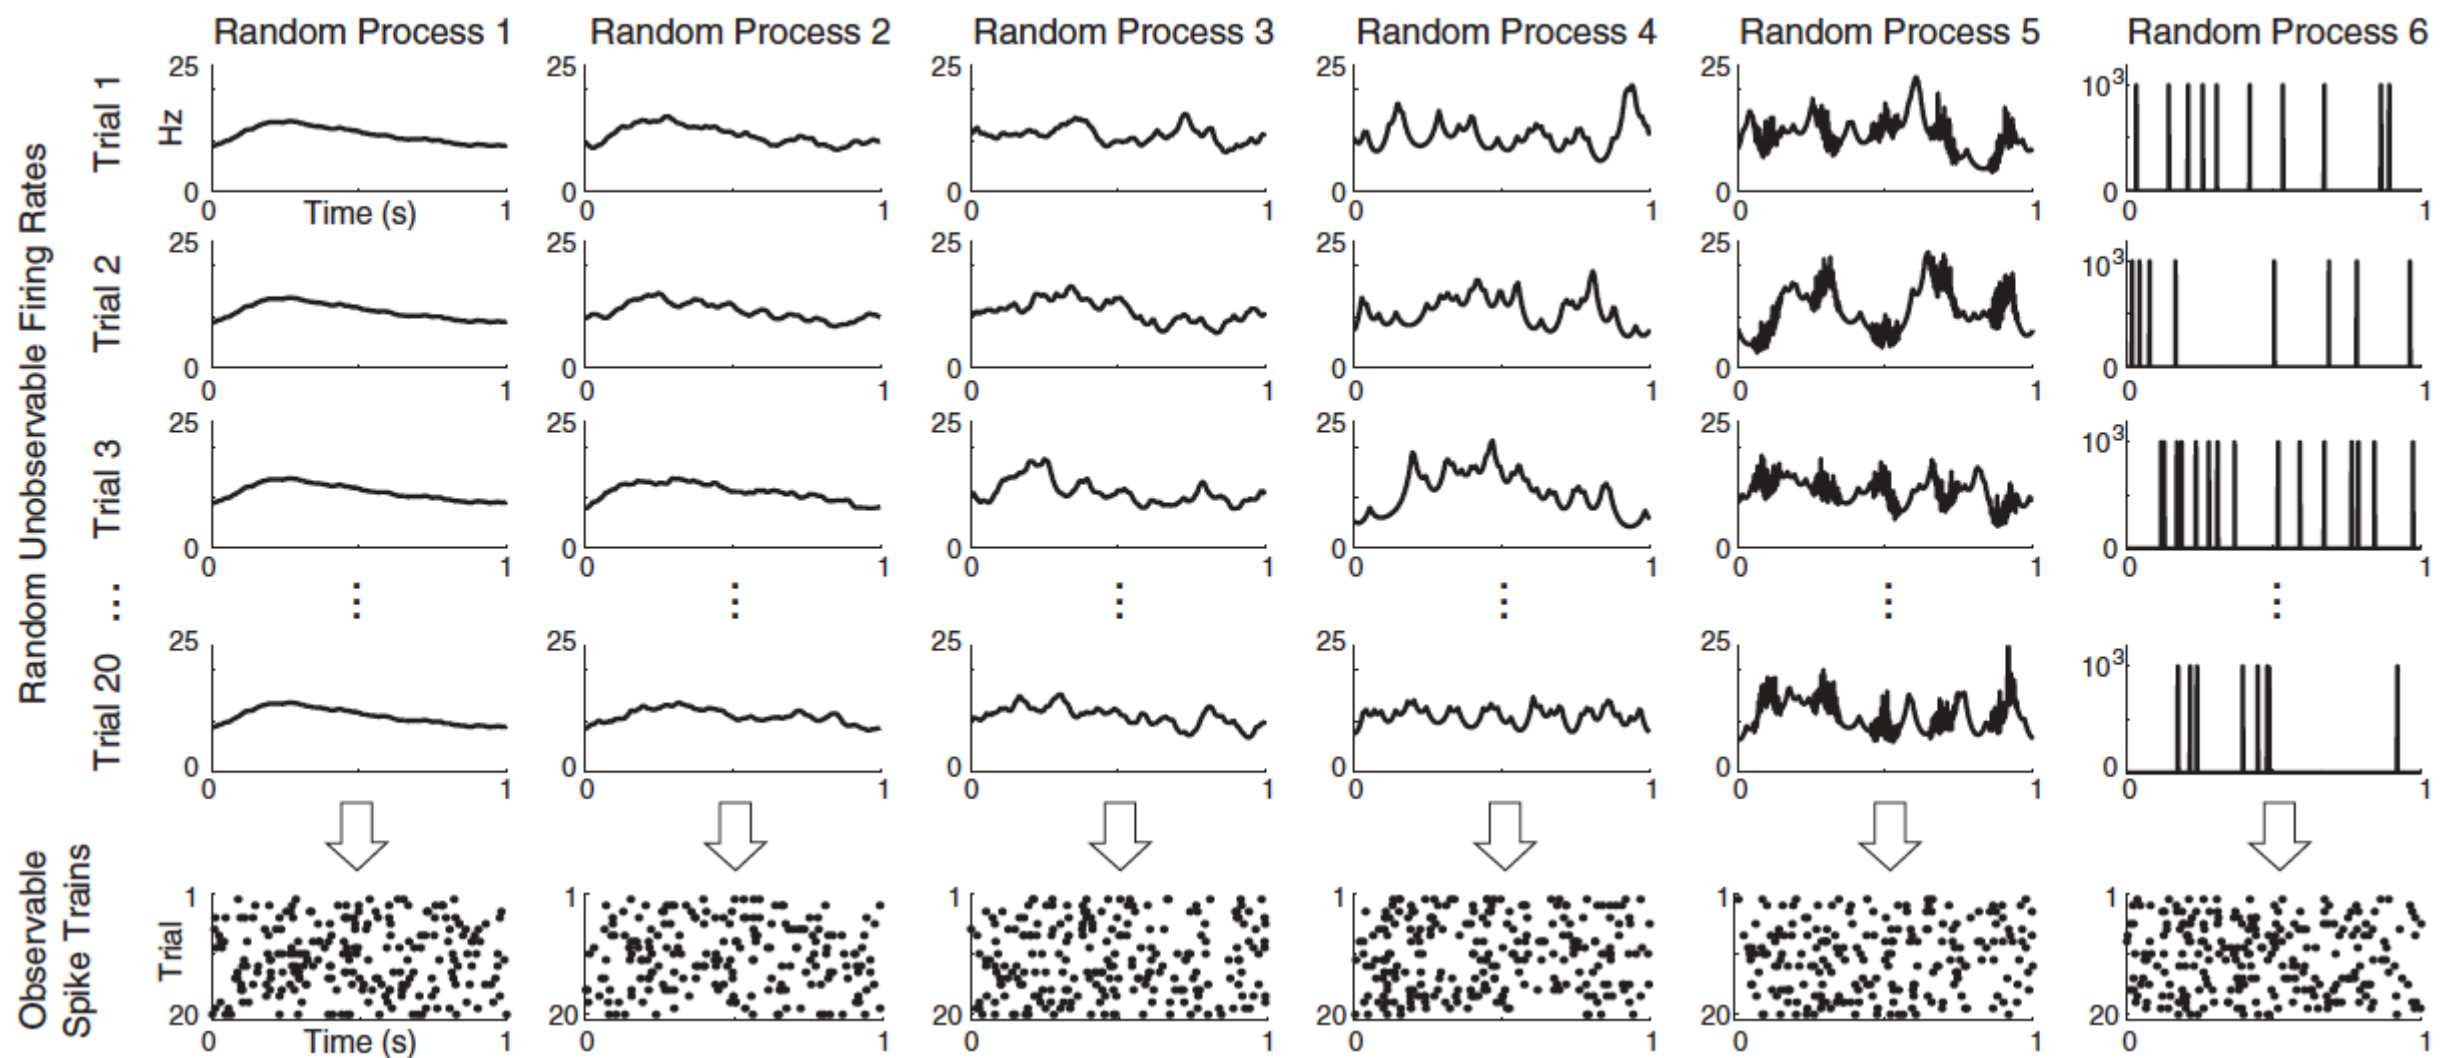

The Importance of Temporal Resolution

Pruszynski & Johansson (2014), Nat Neurosci
Kohn & Smith (2005), J Neurosci

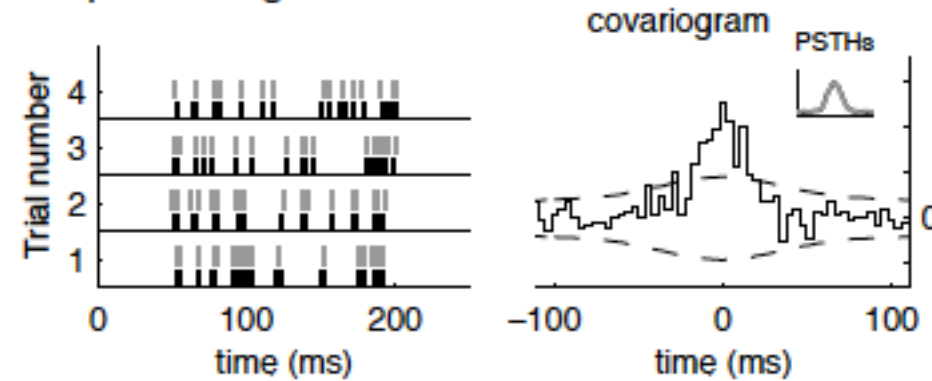

The Problem With Firing Rate Estimation

Different Random Firing Rate Processes Can Create Identical Spike Train Processes

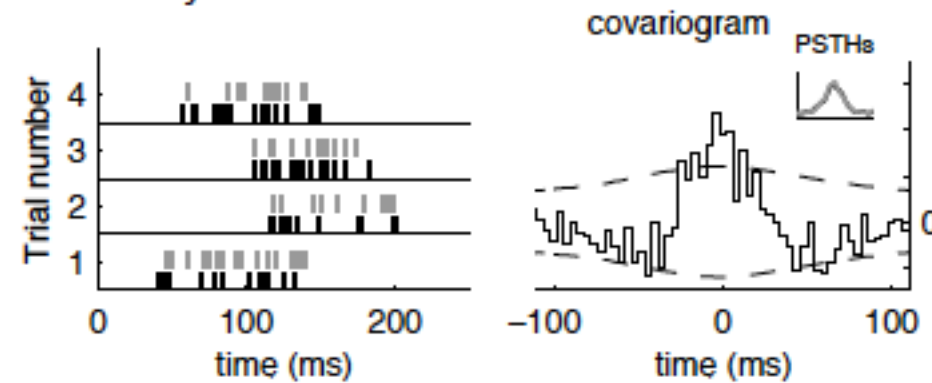

The Problem with Correlation Analysis

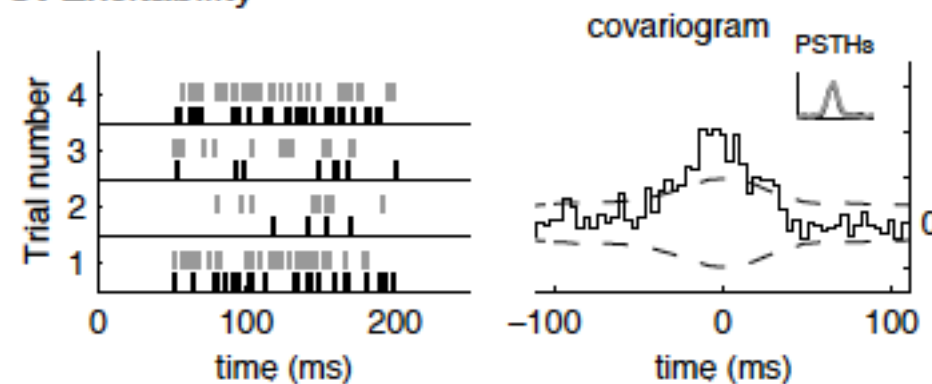

A: Spike timing

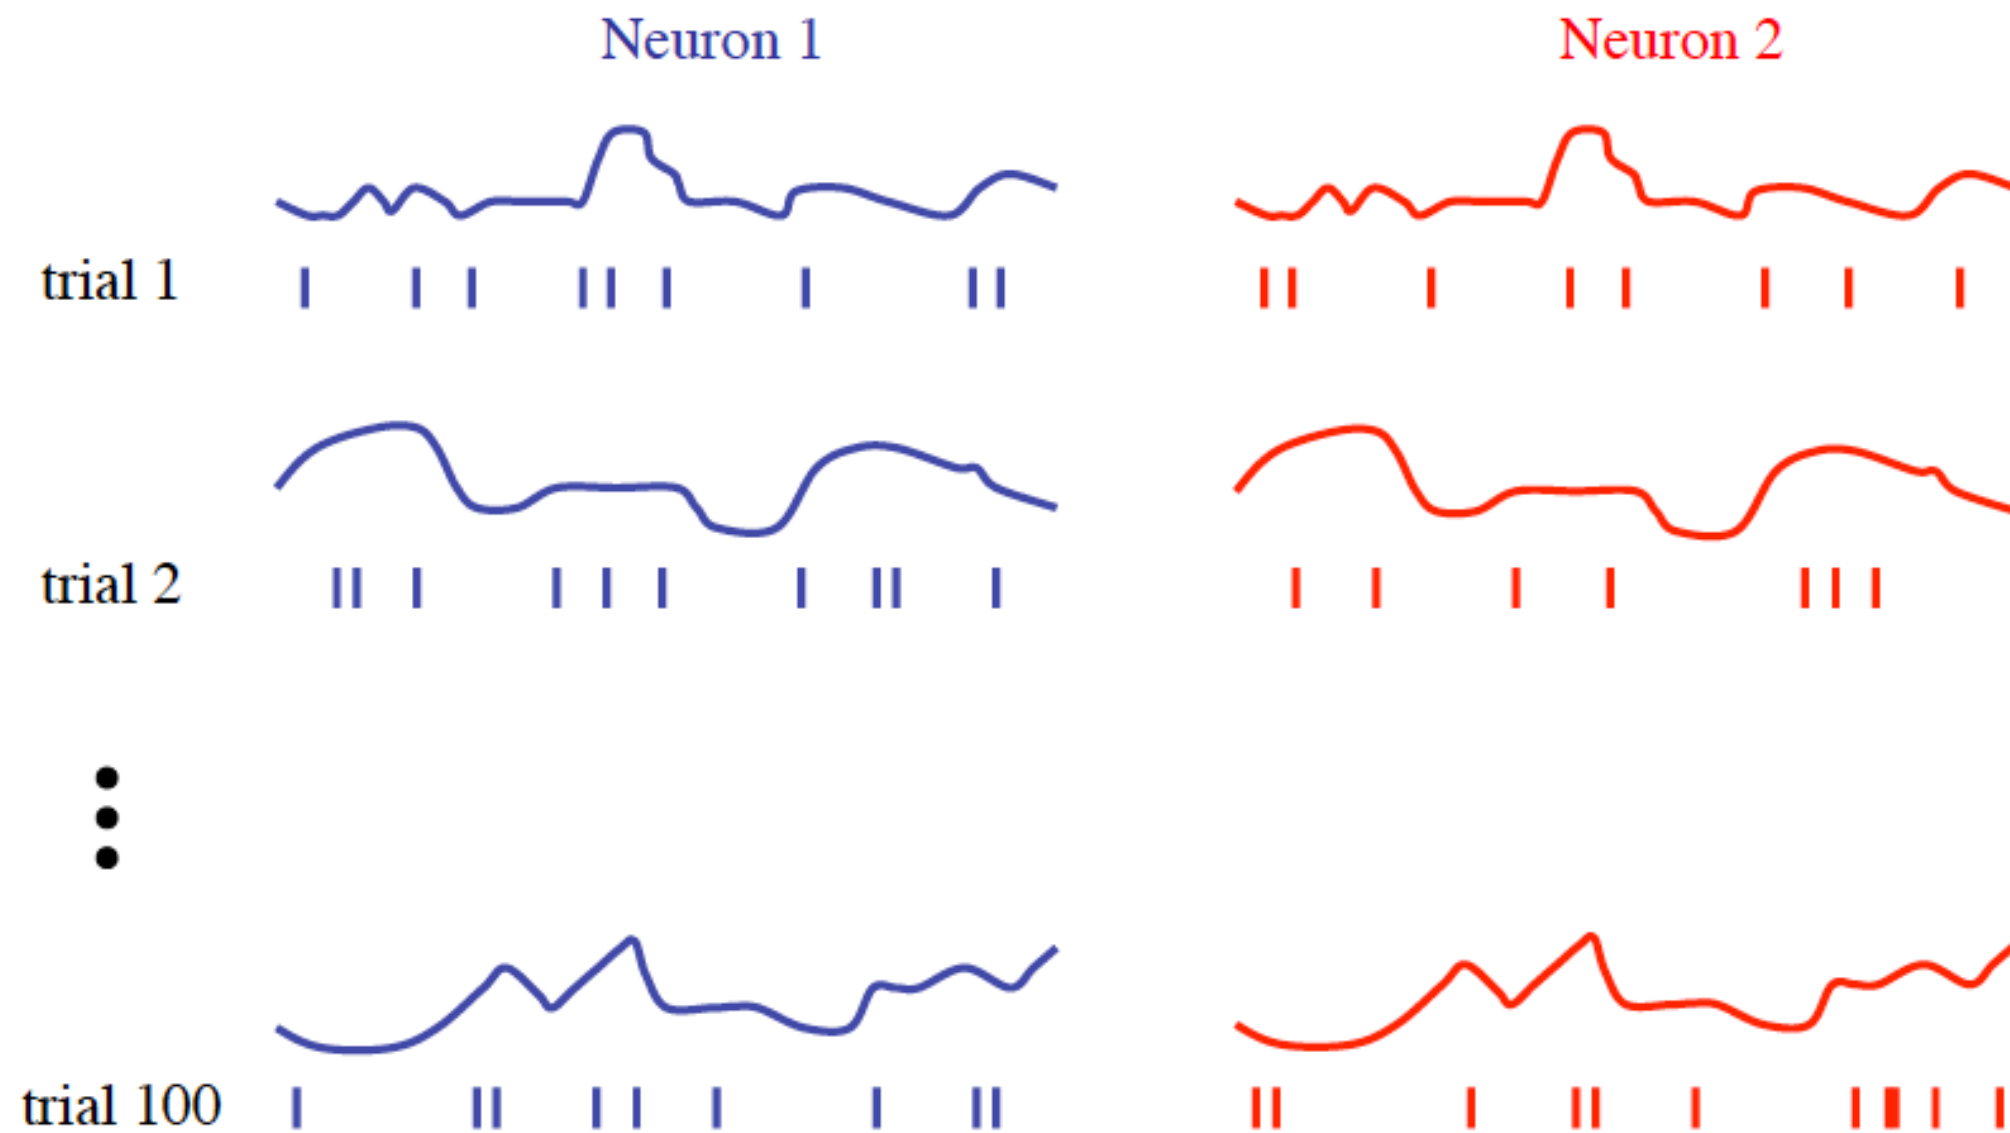

B: Latency

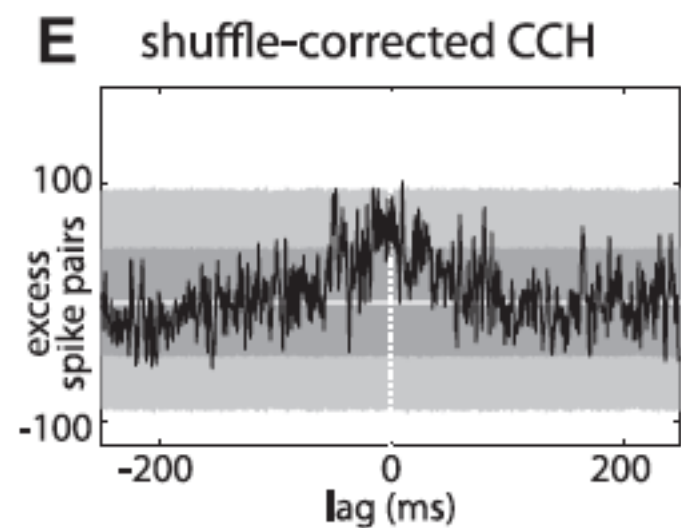

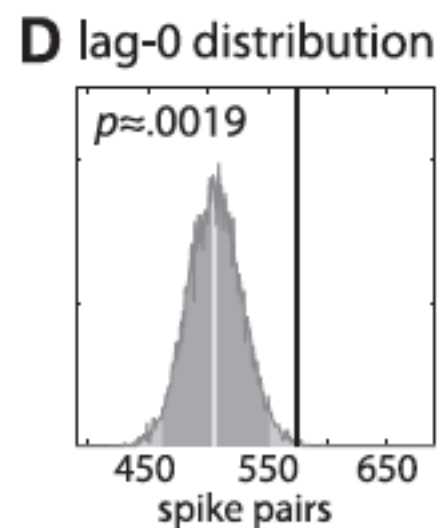

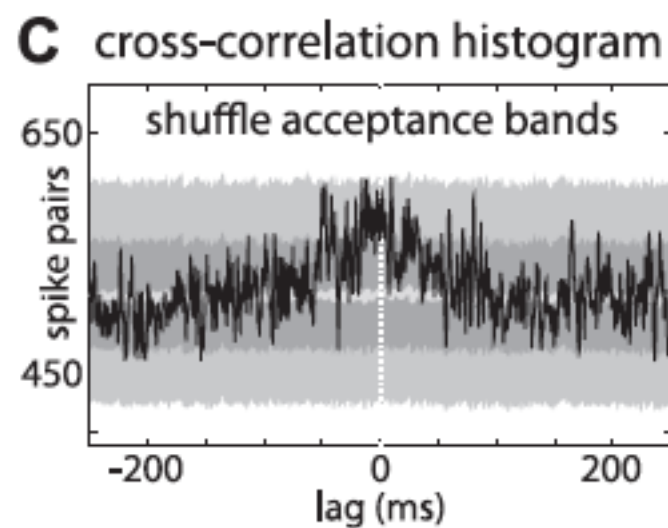

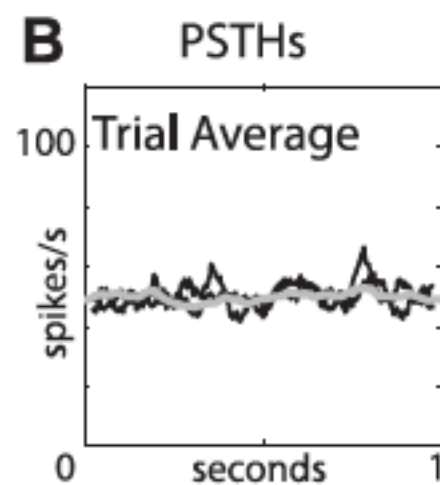

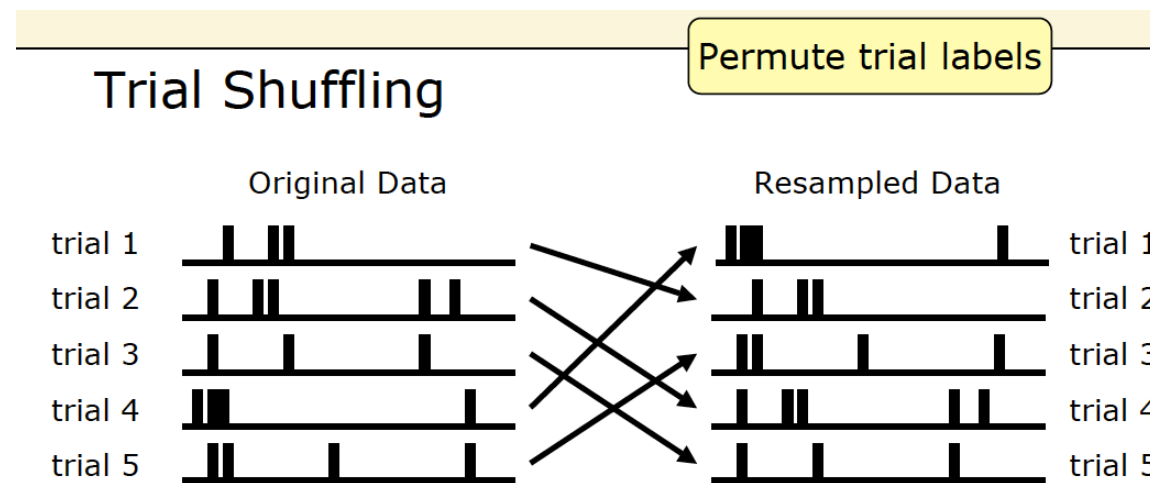

C: Excitability

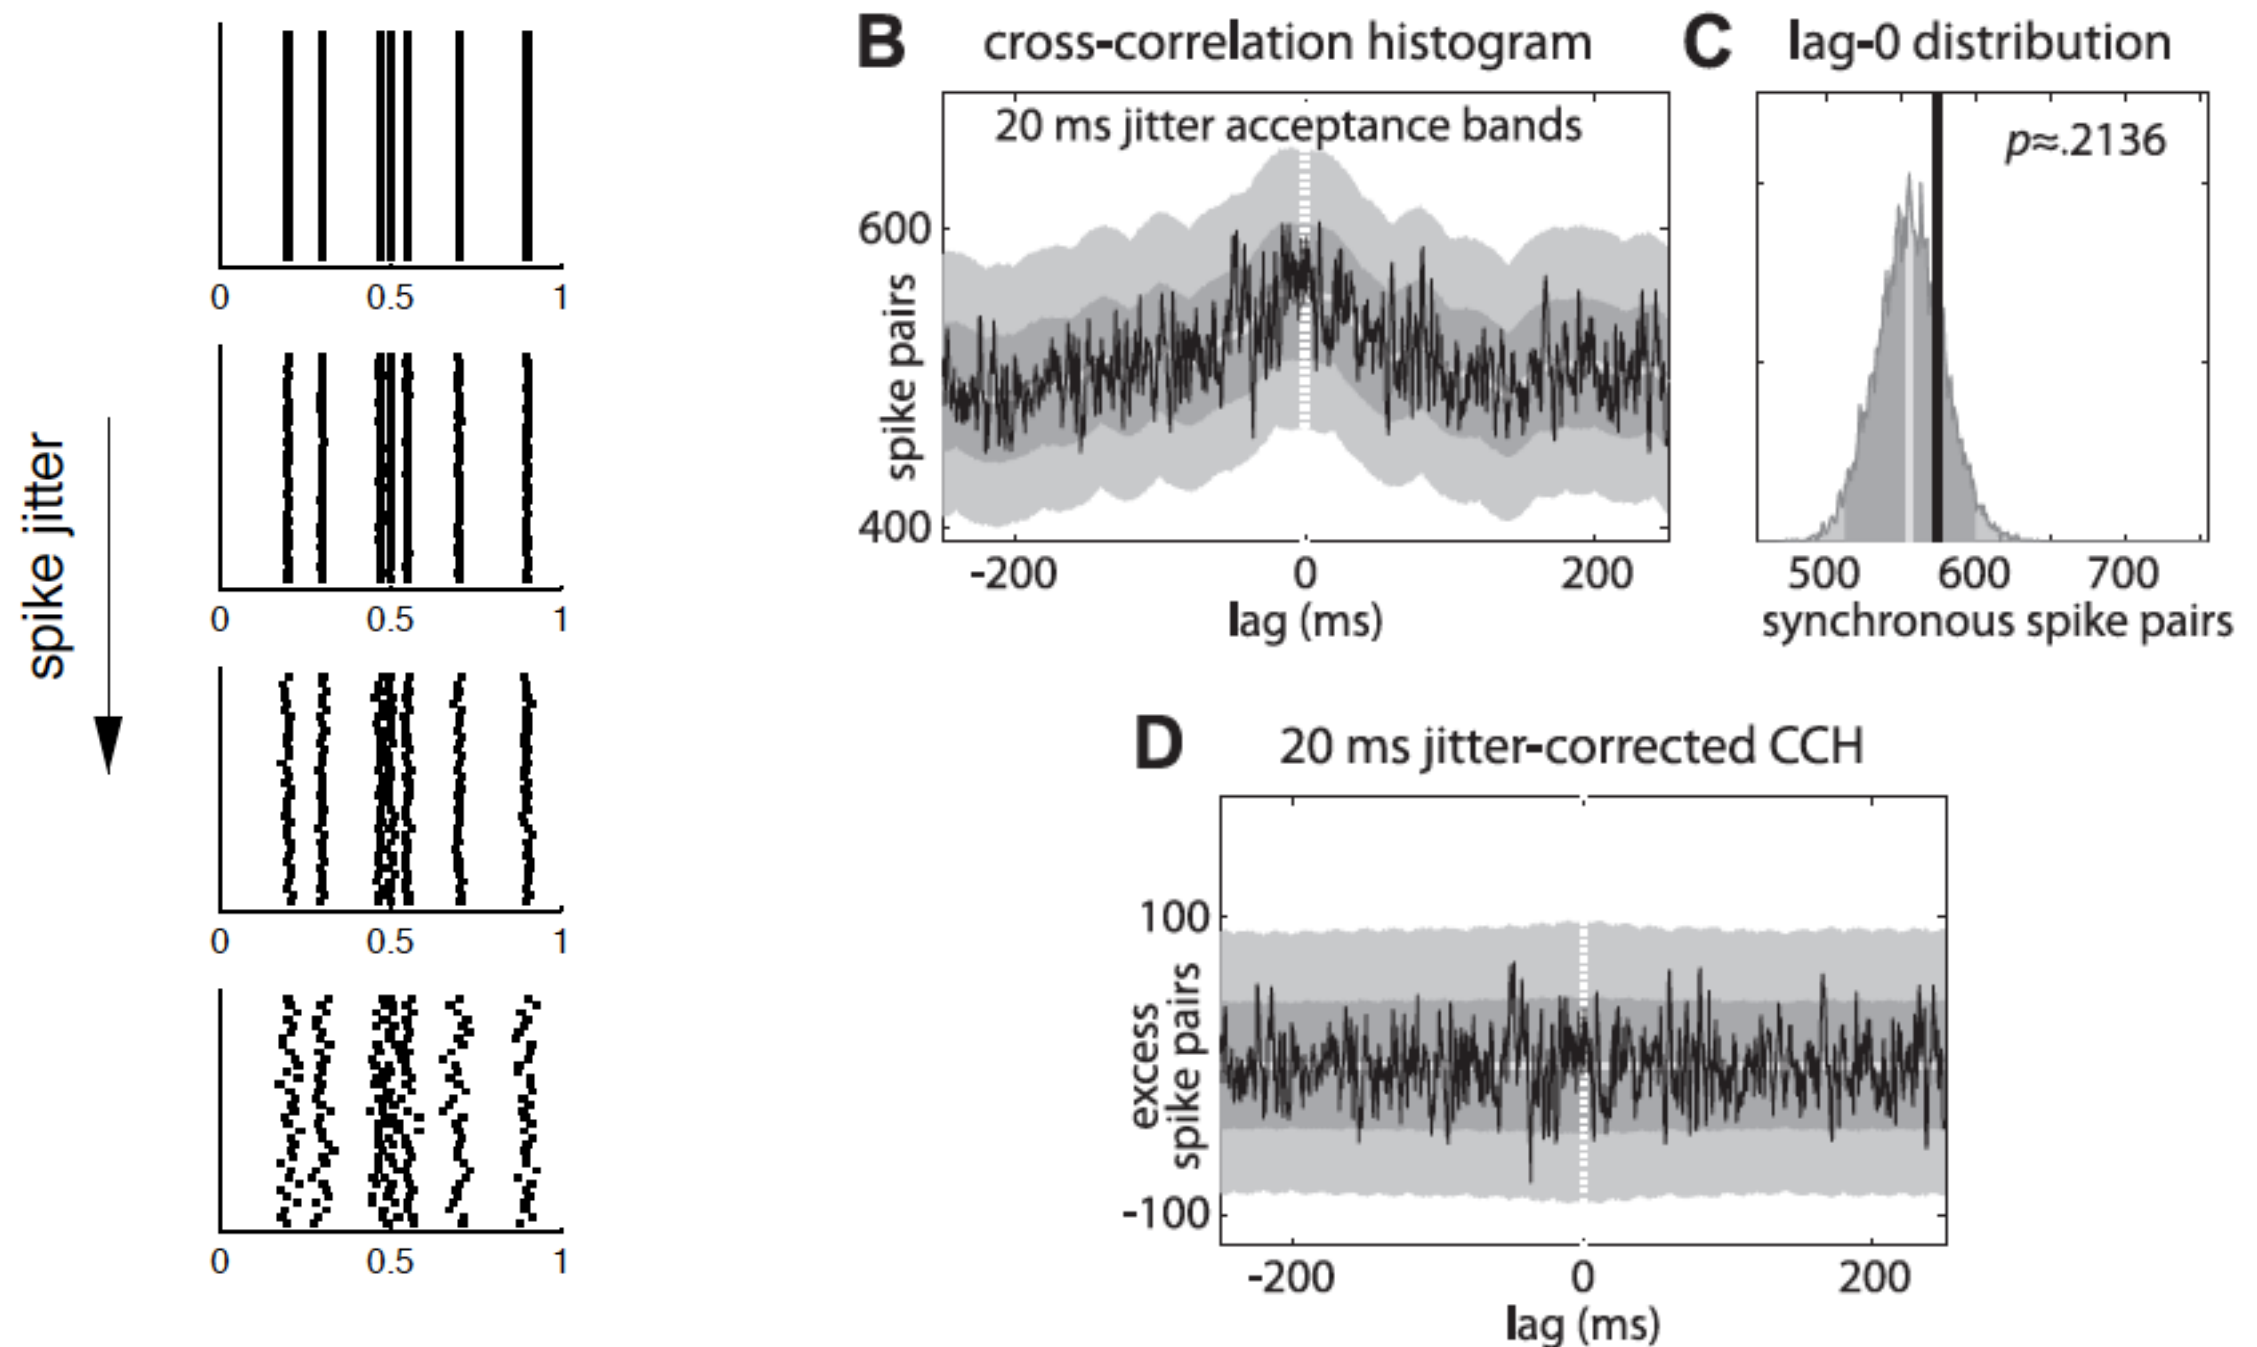

Toward a Statistical Definition of Temporal Resolution

Toward a Statistical Definition of Temporal Resolution

Resolution of the Temporal Resolution Problem: The Jitter Method

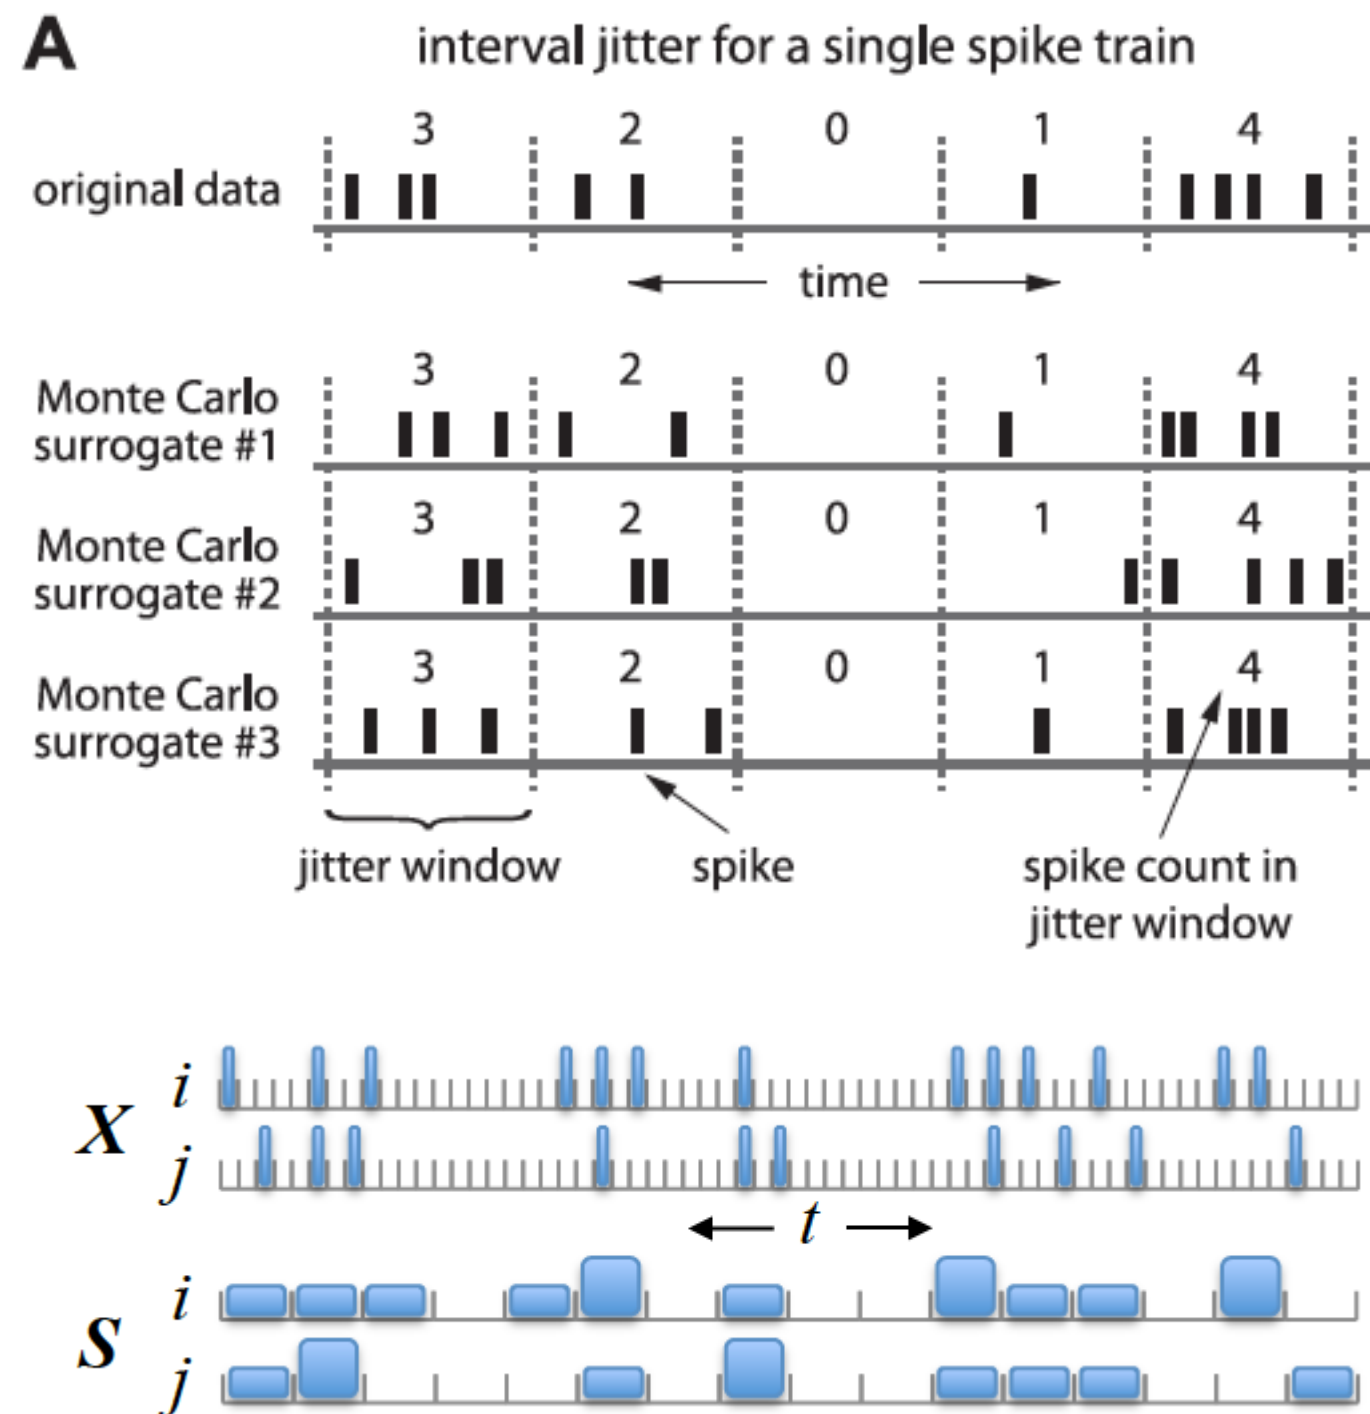

But, There Is a Problem With Our Naive Way of Thinking

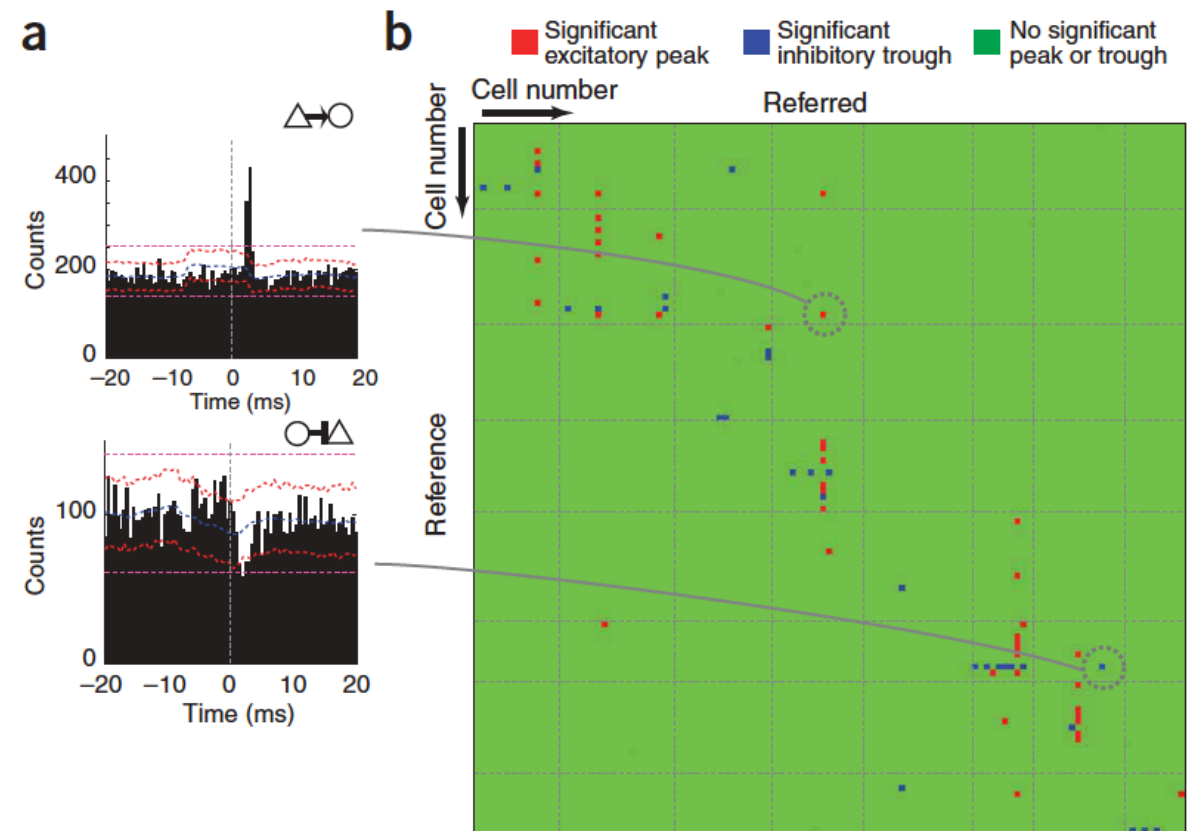

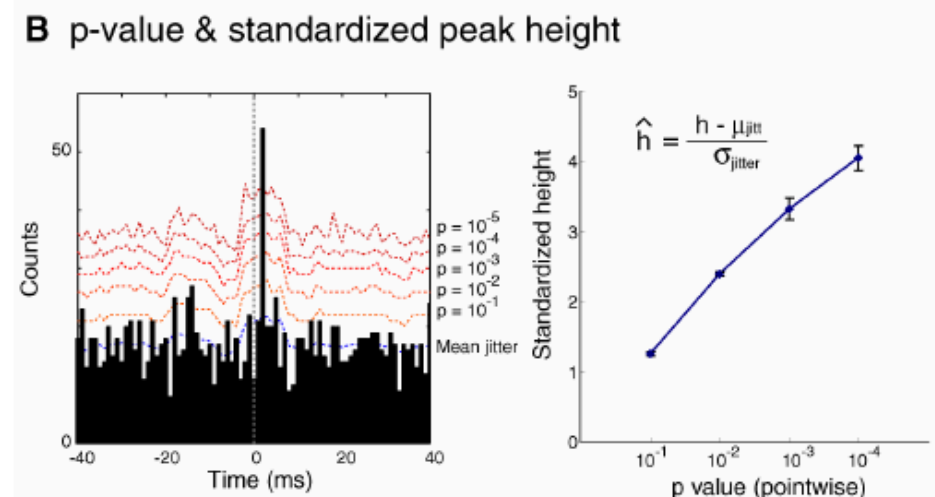

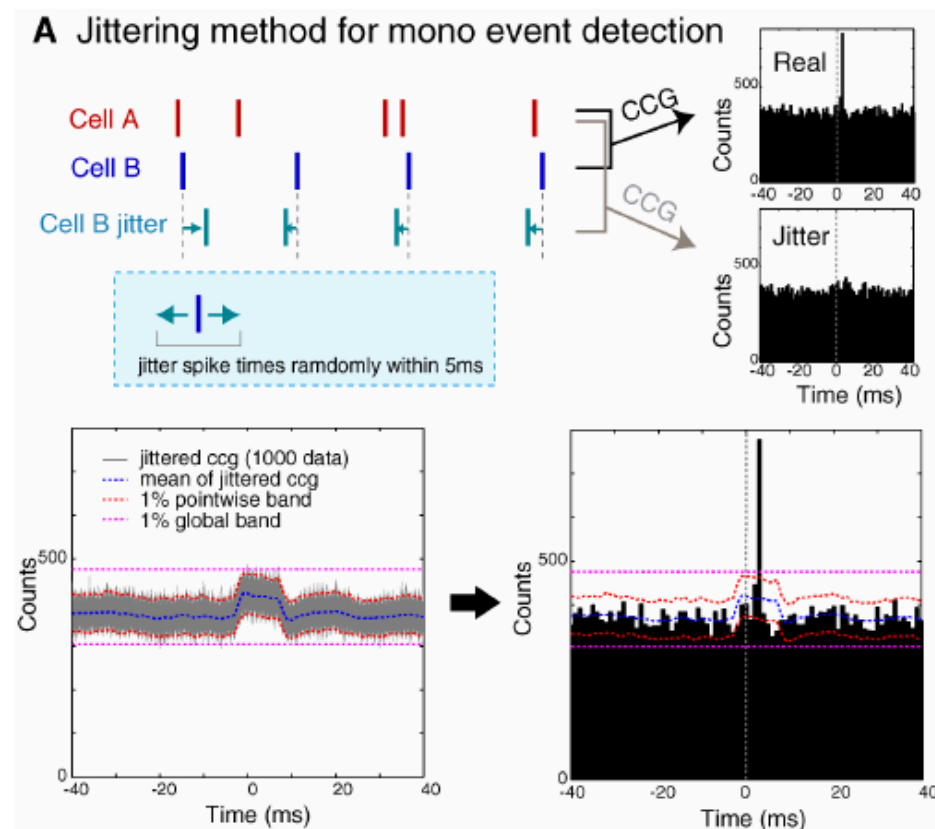

But, There Is a Problem With Our Naive Way of Thinking

Resolution: A Rigorous Formulation of Spike Perturbation Through Conditional Modeling

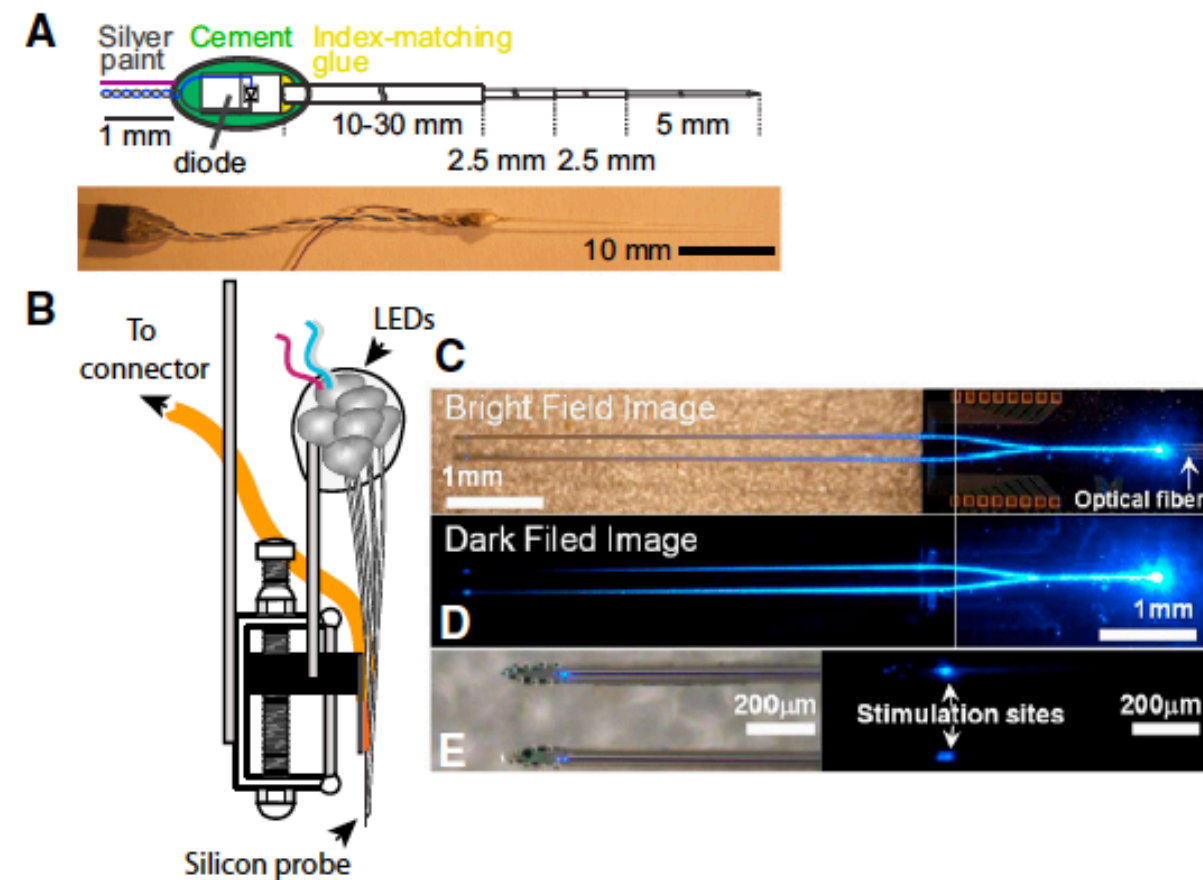

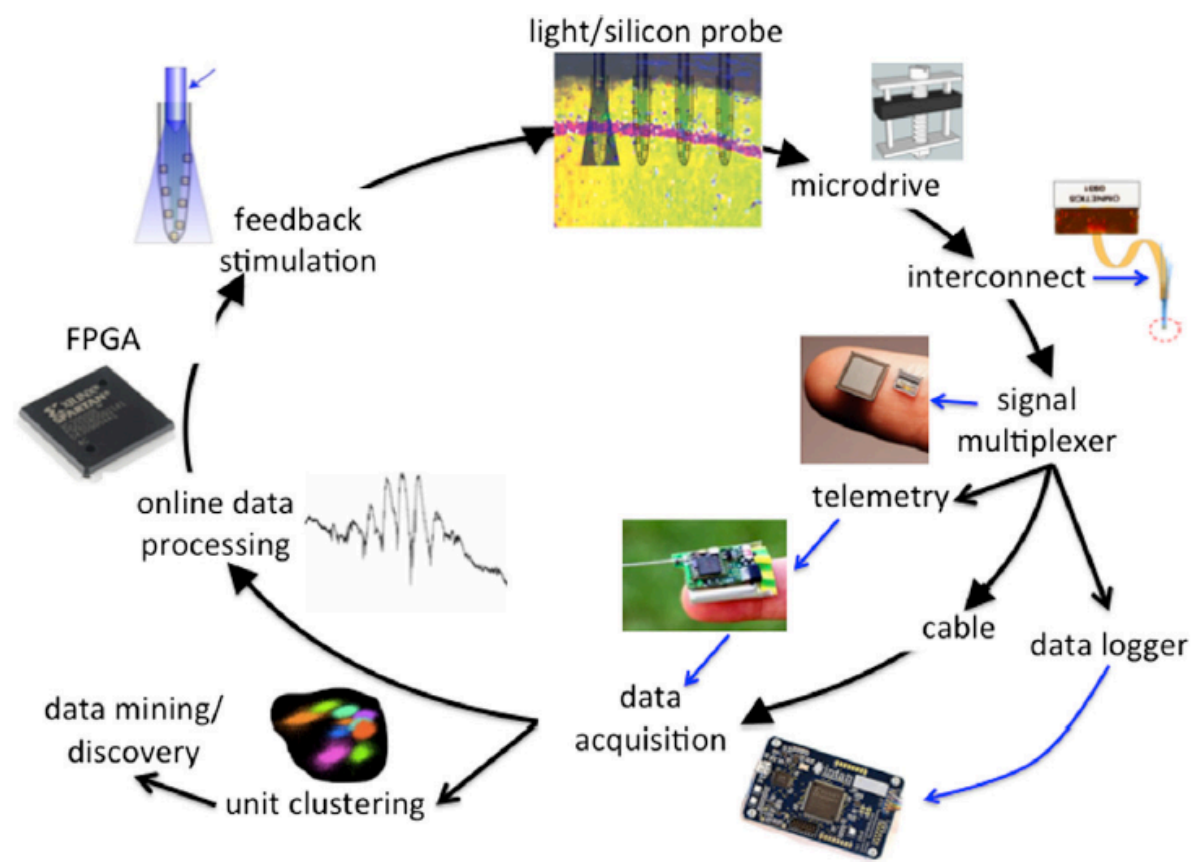

Applications: Dynamical Connectivity Analysis

From Hypothesis Test to Conditional Inference

The Future (Present): Closed-Loop Optogenetics
